Watsons Not To Return as Dorm Directors

by Chip Howe

Roger Williams Residence Hall Co-Director, announced on Wednesday, April 22, that he and his wife will not be returning next year as Dorm Co-Directors. The Watsons apparently didn't have much of a choice in the decision. Qualifications for the Dorm Directorship have been changed for the coming year. The new director is to be someone who can serve in a "full time" capacity. The job will encompass not only running the dorm, but being in charge of student activities, as well. Also, the new director will be allowed to teach not more than one course.

Dr. Watson says that in view of the fact that "teaching is my prime interest" and that neither he nor his wife are trained in activities, they obviously do not fit the new qualifications. But he did affirm that in all probability he will be returning to RWC in the fall in a teaching capacity.

Mrs. Watson will not be returning as the resident nurse. She may be teaching part time elsewhere.

Speaking of his year as Dorm Director, Dr. Watson labeled it "a very unsettled year."

We extend to the Watsons the best of luck and look forward to seeing Dr. Watson back next year in the teaching capacity.

In another related matter, Dr. Watson announced that the new unit advisors have been selected for next year. All applicants will be contacted this week.

The names of the new unit advisors will appear in the next issue of The Quill.

Candidates Needed For Spring Weekend Queen

One of the highlights of the 1970, Roger Williams College Spring Weekend, will be the selection of a Spring Weekend Queen. In order to be eligible for the 1970 Spring Weekend, will be the selection of a Spring Weekend Queen. In order to be eligible for the 1970 Spring Weekend Queen, you must be an RWC student and be a junior or senior. The application deadline is April 30, and the Queen will be announced on Wednesday, May 11 and 12.

The Spring Weekend is a social event during which the present Spring Weekend Queen may fulfill her duties.

Civil Engineering Club Awarded ASCE Charter

The officers and advisor, Mr. Khalil Al-Hammad, of the Roger Williams College Civil Engineers Club were honored at a dinner meeting April 22, 1970 at the Hawthorne Motor Inn by the Rhode Island Chapter of the American Society of Civil Engineers. At this time they were informed that Roger Williams College has been awarded a student charter of the American Society of Civil Engineers. This is the greatest honor ever bestowed on the Engineering School of Roger Williams College in its history. Only two other colleges in this state have had such engineering status, these being the University of Rhode Island and Brown University.

The American Society of Civil Engineers is not only a club but a fund granting organization that dispenses thousands of dollars each year to colleges in award.

Primary School Student Council to the Student Council? How important is the Student Council immediately with the standing with the exactly what that means, that you be "in good nomination. The only requirements which, as we are sure of. Some questions concerning Student Council immediately come into mind. What should a Student Council be and what should it be doing? What type of people do we want on our Council? How important is the Student Council to the student body?

The Student Council should be more than just a weekly social gathering. It should be interested in more than just social events.

The Council should represent the students opinions on College matters affecting the students. After all, the school is nothing without students. Therefore, students have the obvious right to have a say in College policy which affects them.

Roger Williams is supposed to be an experimental college, but unless we get some students interested in the experiment, it is bound to end up a failure. Students should get involved with the school and should care about whatever is going on: should it be the poor food situation or the firing of a Dean. Regardless of what the issue, the students should get involved by mere virtue of the fact that they are ultimately affected.

The Student Council is your avenue of action. It is supposed to be the official channel through which students may be heard.

So get with it. Run for office or help elect someone who is interested and who cares about the school and about you.

The Council can only be as strong as you make it by means of the people whom you elect to it.

We all have a stake in this, so let's all get out there and vote for someone we feel can do the job.

Remember: To be a Student Council representative is not status. It's a lot of hard work. And to get something done it must be composed of people who want something done and are willing to work to get it done.

Let's see you out there on May 11 voting for people who represent you!
Letters to the Editor

To the Editor:

I refer you to the cover of the bulletin of information for Summer Sessions at the Brown Campus that has just been released. The cover shows two lovely students walking past the administration building in the bright sunlight smiling. It is my belief that this photograph is contrived, false and does not, in any way, reflect the students of this school. There were my first impressions when viewing the bulletin. However, the question here is, "What about the prospective student? What would he think of this school by looking at the cover of the catalog?" The answer might be, logically, well, let him look around. Sure, but does this photograph encourage any further investigation?

I would much rather have seen the public relations department issue a bulletin that truly and honestly reflects the students of this school rather than showing two happy little hopers stroll down the flowered path. Let's look at ourselves realistically, for what we are, and not for what we'd like to think we are.

Robert Napier

To the Editor:

At the beginning of the spring semester, after several threatening pamphlets were put on my windshield stating that if I didn't purchase a $5.00 parking ticket my car would be "towed away at my expense," I reluctantly did pay the money.

In my estimation, approximately 90% of the cars in the parking lots are without stickers and nothing is being done about them. In my opinion, this is grossly unfair to the students who were "sacrificed enough" to fall for this line. Are we to receive a refund or is the administration sweat­ ing out the year in hopes we will bother them about it?

Henry Delan

To the Editor:

A big cheer to all of Roger Williams College for its part in the ecology cause. The whole of Roger Williams College sincerely cares and shows this by readily entering into Earth Day's plan. Everything was a gigantic success. The campus lawn was made pure again, the cafeteria was never so immaculate in its existence. Its users were very conscious not to pile trays on tables, leave garbage around and abandon chairs all over. The torches were welcomed and practically everyone was touched in the quadrangle, so he could learn about DDT, vector­ tory and things.

It's good that people are finally beginning to like themselves. After all, how can one treat our envi­ ronment certainly reflects how one treats himself.

(These are ambiguous paragraphs. Read into them all that you can.)

ATTENTION, ALL ENGINEERING STUDENTS

1. Those students interested in becoming Charter Members of Roger Williams College Student Chapter of the Rhode Island Society of Professional Engineers are urged to attend a meeting on TUESDAY EVENING AT 7:30 P.M. APRIL 26 — ROOM P-2

2. A movie will be shown about the Engineering and Construction of the Newport Bridge

3. Coffee will be served.

4. All Seniors, Juniors, Sophomores and Freshmen are urged to attend.

GET AHEAD AND JOIN A GOOD PROFESSIONAL SOCIETY
Daley Speaks in Providence: End of World in Sight?

by Howard Ginsburg

Austen C. Daley, Chief of the state's air pollution control spoke to a small number of ecology minded students of Mr. Kly, the biology teacher in the Providence School Campus the day before Earth Day.

“We are facing a terrible crisis,” said Daley, blaming 60% of our problems on the automobile. “With the increasing popularity of the car, we are losing our forests, our streams, and our clean air. A dinner at out of fresh air,” continued Daley. As an example of the pollution problem, he cited the Los Angeles Basin, an area of 1,000 square miles, which produces 8 million people, who own a total of four million cars, 56% of their pollution problems are with auto, while only 10% are caused by power plants.

“One of the main reasons,” said Daley, “for so few other problems are the laws prohibiting pollution. It is this issue that is pressing in the State of Rhode Island. Inversion is another factor contributing to air pollution in the Los Angeles Basin. Smog has been observed in the area with the poisons (gases) reemerging over other areas.

THE QUILL

Commencement Ball, Class Day Plans Announced

The Senior Week Committee has announced a planned schedule of activities for the week of graduation. Since Professor Fink is not out of the university this is the first time, will be graduating classes, and we are hoping to have a good program going along with the usual Associate Degree students, this year’s Senior Week activities will be the most exciting attendance ever before.

Wednesday, May 31st — a clambake with a choice of lobster, baked chicken, steamed clams, and jumbo shrimp along with a large selection of drinks. It will be held at Chop­pen Hill in the Victory Highway in New Southcote from 12 noon until 12 midnight. Facilities include a large boat, volleyball, badminton, horseshoes, beach ball, and a 28 acres of land with inside and outside recreation areas. Dance to Bob Wilbur’s Band from 8:00 to 12:00; Sched­uled for the 1st time, will be held at Class Day.

May 31st — a boat and a prop­er­g­­y — both similar to hamburgers, and hot dogs you can eat.

Monday, June 1st — an awards banquet at the downtown Hilton in the room of 6:00 to 12:00. They seem to have much room for the banquet.

Women taking the pill should have a complete checkup every 6 to 12 months. This checkup should include a Pap smear, a breast exam and blood-pressure measurement.

THE PILL Safety or Hazard?

Each of the three alternative contraceptive measures must compare the estrogen struc­ ture device (IUD), the dis­ persion, and the condom — are considered potentially harmful. In its disadvantages, the magazine says...

Some persons might want to consider sterilization — tubal ligation and vasectomy. In men — says Consumer Re­ ports, noting that sterilization has physiological effect on sexual performance or enjoyment.

If, for whatever reason, the pill is the chosen method of con­traception, there is still some helpful advice on which many authorities agree, says Consumer Reports.

Daley

(Continued from Page 3)
wind speed in the Basin is only 5 miles per hour.
Daley said future automation will eliminate hydropower and other associated air pollutants by 50%, but what good is it if the amount of cars double?
Asked whether we can reduce air pollution in 10-20 years, Daley replied by saying, "we have to, or it will be the end of the world." He said it is up to our generation to do something about it. Daley continued by saying that if we had a group of people 20 years ago as angry as the people today, we wouldn't be in this mess.
Whether Earth Day accomplishes its purposes or not, everyone would like to see our generation fighting to preserve our society rather than fighting to destroy it.

EcoLOGY LECTURE MONDAY NIGHT

Tonight at 8 p.m. the Bristol Historical Society will hold its annual meeting in its headquarters on Court Street in Bristol. The speaker will be Dr. Donald J. Zinn, Professor of Zoology at the University of Rhode Island. The topic of discussion will be 'The Ecological Future of Narragansett Bay.'

Before coming to URI in 1964, Dr. Zinn was a naturalist at the Woods Hole Oceanographic Institute and he continues to spend his summers there.

The lecture will be open to the public and especially invited are any Ecology enthusiasts from RWC.

That's tonight at 8 p.m. in the Society Headquarters on Court Street in Bristol.

CLASSIFIED

FOR SALE: "National" portable tape recorder. Plays either by batteries or house current. Voice activated, 5" reels. 3 extra blank reels. Automatic reverse. Bought for $110. Will sell for $45. Call 397-5848 after 6 p.m.

FOR SALE: 1967 SS/ES 500 CAMARO. Blue with black interior, luggage rack, rally sport package, muscle four speed, pro traction, 350 cu. in., 265 H.P., $1600 or any reasonable offer. Contact ALFRED ROY at 508-6296.

AWARD (Continued from Page 1) which it has student chapters. Affiliation with this organization enables this college to obtain grants, to obtain equipment for the need, to build an engineering curriculum, to be nationally accredited and also accredited by the Engineer Council of Professional Development.

This same club gained recognition by the State of Rhode Island, which allowed the students of Roger Williams College to take the Engineer in Training (EIT) examination twice each year. This examination is followed by four years after passing the EIT by the Professional Engineers Exam which allows the people to become Registered Engineers in the State of Rhode Island.

EARTH DAY
“A Time of Warning”
by Peter Holden

The first National Environmental Teach-In was held on April 22 in which the idea was to re-establish friendly relations between man and his environment by creating a public awareness of what man is doing to himself.

The philosophy of this conservation clean-up was put forth as RWC by a series of programs including lectures, films and discussions on such critical problems as Overpopulation, air pollution, and water and land destruction.

Various subjects were covered in the discussions held at the Bristol Campus by such teachers as Mr. Trescott, who spoke about the frightful predicament of overpopulation. Considering that population has been increasing faster than the food supply since 1958, and ten to twenty million people already starving to death each year, and that 5% of the world’s grain goes to feed hungry cattle, there are five thousand five hundred Americans who produce a million tons of garbage each year, not to mention that the world population will double in 35 years, this is the most important aspect of our environment.

Accumulation of DDT and similar poisons could bring about life-providing processes of photosynthesis to a halt and leave the oceans as dead at Lake Erie by 1974. Even Americans will probably be subjected to water rationing by 1974 and food rationing by the end of the decade. Hepatitis and epidemic dysentery rates could easily climb by 500% in this country by 1970 and 1974 on account of crowding and increasingly polluted water.

The prospects of worldwide plagues and thermonuclear war gave more distinct each day as population pressures the limited resources.

Other speakers of Earth Day included Richard Moses who spoke on Zero Population growth, in which the number of people will be controlled by families planning how many children they will have. That is, no more than two per couple. It a larger family desired, the family would simply adopt as many as they wished.

Mr. Porter spoke on air pollution which is becoming a more urgent problem every hour, and may reach frightening proportions as early as 1975.

Other speakers of the day included Adam Tomash, Priscilla Muly and Burdett Barrett. Mr. Seidman concluded the discussion by speaking on the pollution right here on our campus. Following his speech many students spent a great deal of time and effort cleaning up the school grounds which resulted in at least 45 bags of trash as well as an assortment of old tires, sticks, boards and rubbish. Considering that in the course of one year 370 million tons of garbage and sewage piles up, it is everybody’s duty and obligation to clean up and pick up what one can, that is if a cleaner environment is really desired.

If you want to know more about what you as a private person can do to help fight pollution write for a free publication called “Do-It-Yourself-Zoobery.” This is free of charge incidentally. Address Miss Susan Winston, C/O Environment Action Inc., 2000 Pat., N.W., Washington, D.C. 20036.

Any congestion pollution can and should be reported to the authorities in the state health department who are responsible for correcting it.

Carleton Place, Chief of the Water Pollution Control Board, State House, Providence or Augustine Dallas, Chief of the Air Pollution Control Board, State House, Providence.

Remember: You are the only solution to pollution!

Business Club News

The first annual banquet of the RWC Business Club will be held on May 22, 1970 at 7 p.m. at the Foilfast Restaurant & Cocktail Lounge on route 6 in Cranston, R.I. The banquet will be held in the SHERWOOD ROOM.

During the April 16th meeting of the Business Club, candidates were nominated for the outstanding Business Senior Award. The following names were placed in nomination: Lenny Berk, Ron Martel, Dick Mayo, Alan Brysh and Gary Dilorio. A closed ballot vote was taken and Lenny Berk and Ron Martel were the two finalists. These two seniors will appear before the Business Club members during the April 25th meeting. At the end of the meeting the finalist will be chosen by a closed ballot vote.

Sports "INS & OUTS"  Drugs In Sports

by Peter Greenberg

The United States Pavilian in Osaka, Japan, which will most likely be the center of attraction at Expo '70, is a vast, translucent sheet of fiberglass-reinforced vinyl in a x 1, about one-sixteenths of an inch thick, supported on nothing but the bubble-like structure planned for the 1933 Chicago World's Fair. It has been sold to Osaka Bubble, that probably could not have been constructed 50 years ago.

In time, Roger Williams College will also become the center of attraction in Ehdo Island as the second institution to procure a bubble-like sports Arena.

The implications for this structure are vast, exciting, and challenging. With heads held high and proud, let's keep the sports pride moving and show the President of this progressive college that these needs must not be put off!

First Baseball Victory

After dropping the opener to Curry College 4-2, the Roger Wil­liams Hawks defeated Ha­thorne College 11-7 for their first victory of the season. Chris Castor, first baseman, sparked RWC to the first victory in Honcon baseball history. Leddares hit two home runs at Cadet Field in New­port, the first over the flag pole in Center field, the 2nd with bases full carried over 450 feet and landed on Thames Street. Boston narrowly missed a third home when his drive hit the fence before, and though not possessing this stuff, was tough in the clutch in catching Hatcher's fly. Most of the team is made up of Dunks, and freshmen and sophomores and Coach George Butler has expressed great pride in the way that they have overcome the poor weather conditions and lack of a baseball diamond in preparing themselves for this maiden season.
